Purpose of the Youth Database

- The Youth database is at part of the reform "Ungepakke II"
- Purpose as described in the law of guidance:
 - Provide Youth Guidance Centres and Jobcentres (PES) with data on the educational and employment status of their tagentgroup
 - This enable Youth Guidance Centres and Jobcentres to target their effort – it enables them to sort of young people, that are not in education or employment in order to take measures:
 - 15-17-years-old: Must be in education or employment
 - 18-24-years-old: Youth Guidance Centres must make contact and motivate for education
 - 25-29-years-old: Job centres must make contact to unemployed and take measures for employment
 - Provide up-to-date overview and statistics for the educational and employment status of 15-29-years-old

Content in the Youth Database

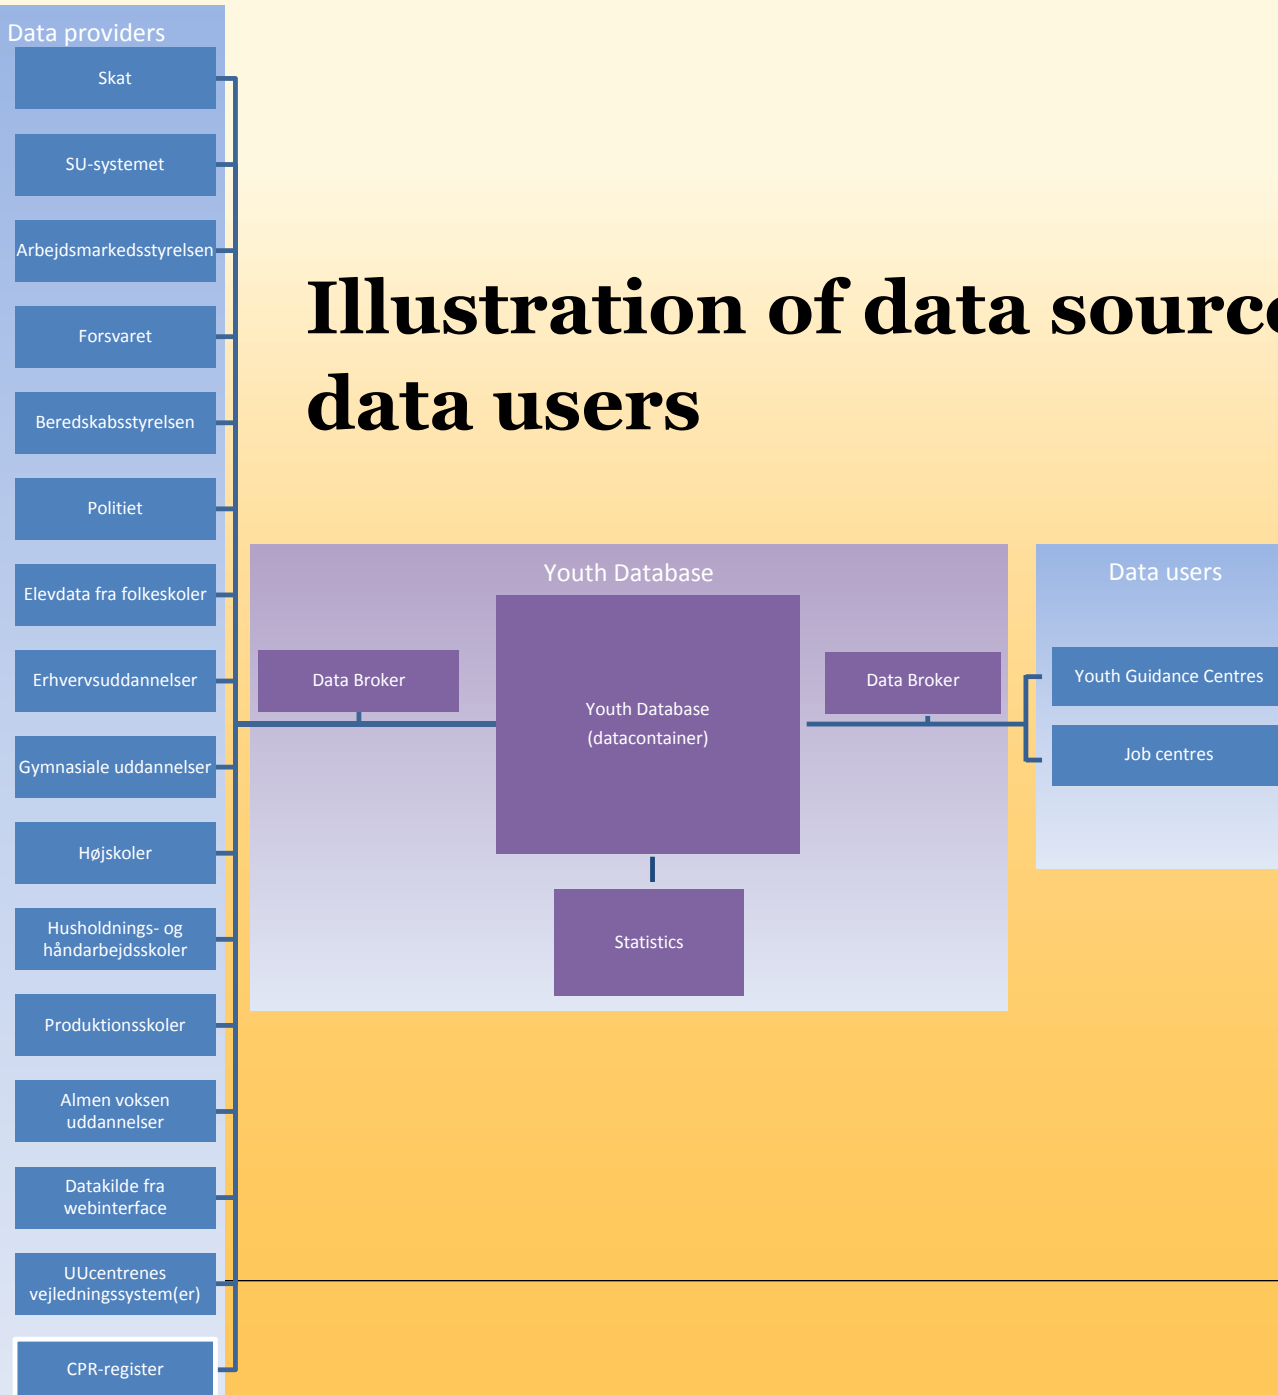

- Data on all 15-29-years-old (in accordance with the Danish Civil Registration System)
- Data varies depending on the age groups:
 - 15-17-years-old: Data on educational status, highest completed education, other activities according to the individual education plan, employment, public dependency basis, and employmentactivities according to the law of Active Employment Measures.
 - 18-24-years-old: Data on educational status, highest completed education, employment and public dependency basis.
 - 25-29-years-old: Educational status and highest completed education.

Data sources and data users

- Data is collected from a series of systems:
 - Administrative systems at educational institutions
 - The Youth Guidance Centres' system
 - The Danish Tax and Customs Administration (information on employment on public dependency basis).
 - The national labour market authority
 - The Defense and Police
- Administrative data has been transmitted to the municipalities (Youth Guidance Centres and job centres) since January 2011

Illustration of data sources and data users

Statistics

- The database will enable up-to-date statistics for the educational and employment status of 15-29-years-old
- Statistics are not yet been published because the last errors are still being addressed
