Erasmus+

Euroguidance in relation to national guidance policy

Examples of EG **existing** synergies with...

- National forums for cooperation within the area of guidance
- Joint events such as conferences and seminars
- Regular meetings
- Common publications and articles
- Dissemination of ELGPN information to national guidance community
- Translation of ELGPN documents
- Promotion of each others activities/web banners/links
- Cooperation on national guidance system descriptions

Euroguidance main fields of expertise in guidance delivery

Erasmus+

European Area for Skills and Qualifications - Euroguidance position paper

- Synergies and cooperation already exist on national level
- Different goals, target groups, activities and hosting organisations → single access point could be problematic and ineffective
- Cooperation and better accessibility does not depend on a single access point → add into terms/contracts
- Euroguidance activities targeted to the guidance practitioners and the end users are an important support for the European Area for Skills and Qualifications

Perspectives to enhance guidance practice within the European Area for Skills and Qualifications - Euroguidance contribution

- Guidance is crucial for further strengthening the links between education/training, mobility and the labour market
- Career management skills should be included in the EU key competences framework and the framework should be supported by guidance provision.
- The implementation of the learning outcomes approach needs to be supported by guidance services

- Need for better trained and skilled guidance practitioners

Erasmus+

European Area for Skills and Qualifications - Euroguidance perspectives on further synergies

- Euroguidance serves as “gateway” to other networks and bodies
- Building on the Euroguidance experience on mobility guidance, the global perspective should be supported
- Euroguidance works to enhance training and skills upgrading activities for guidance practitioners

- Areas of stronger synergies between Euroguidance and other networks

PLOTEUS, Portal on Learning Opportunities

22 Juli 2014

Welcome to PLOTEUS (Portal on Learning Opportunities throughout the European Space).

PLOTEUS aims to help students, job seekers, workers, parents, guidance counsellors and teachers to find out information about studying in Europe.

On this portal you will find information on learning opportunities and training possibilities available throughout the European Union. The website contains links to web sites of universities and higher education institutions, databases of schools and vocational training and adult education courses.

To help making informed choices this portal also contains links to websites where you find everything you need to know when moving to another European country. You will find links to:

- Websites with descriptions and explanations about European education and training systems.
- Websites with information on cost of living, tuition fees, finding accommodation, legal framework and other general information for European countries.
- Websites with exchange programmes and grants (Erasmus, Erasmus+ Leonardo da Vinci, Grundtvig, Youth in Action) available in European countries: who to contact, how to apply for grants, etc.

To help you in your search for information you can contact the member of the Euroguidance network in your country.
